

MODULE-2
SESSION-1

1.

Write a short paragraph in your own words defining what a 'program' is and give one real-life example from any app you use daily (like Instagram, Zomato, or Paytm).

ANS:

A program is a set of instructions written in a programming language that tells a computer or mobile device what tasks to perform. Programs help users complete specific activities such as sending messages, making payments, or ordering food. For example, when I use Paytm to pay a bill, the program processes my payment details, verifies the transaction, and shows a confirmation message.

2.

List three popular programming languages you have heard of, and for each, mention whether it is usually compiled, interpreted, or can be both.
Hint: Think of languages like Java, Python, and JavaScript.

ANS:

Programming Language	Compiled / Interpreted
Java	Both (compiled to bytecode and then interpreted/JIT compiled by the JVM)
Python	Usually Interpreted
JavaScript	Usually Interpreted (modern engines also use JIT compilation)

3.

Draw a flowchart (on paper or using any online tool) for the process of booking a movie ticket on BookMyShow, starting from opening the app to receiving the booking confirmation.

ANS:

Start

|

v

Open BookMyShow App

Receive Retry Payment

Booking |

Confirmation |

_____ |

|

v

End

4.

Write down the steps (as an algorithm, using simple numbered instructions) for ordering food on Swiggy — from opening the app to completing payment.

ANS:

Algorithm for Ordering Food on Swiggy

1. Open the Swiggy app.
2. Log in to your account if required.
3. Enter or confirm your delivery address.
4. Search for a restaurant or food item.
5. Select the desired restaurant.
6. Browse the menu.
7. Choose the food items you want to order.
8. Add the selected items to the cart.
9. Review the cart and check the total amount.
10. Apply coupons or offers if available.
11. Click **Proceed to Checkout**.
12. Select a payment method (UPI, card, wallet, etc.).
13. Complete the payment.
14. Receive order confirmation and estimated delivery time.
15. Track the order until it is delivered.

End of Algorithm.
